UPDATE: As of 5/26/2011, 12pm:

- 9 confirmed cases of horses with EHV-1
- Two horses, which tested positive for EHV-1, were euthanized after showing severe neurological signs associated with the disease.
- 22 suspect cases. NOTE: Suspect cases are those horses that are believed to have been exposed to EHV-1, show consistent clinical signs of the disease, and have confirmatory tests pending OR are horses showing clinical signs and located in a quarantined facility with a horse confirmed to have EHV-1 in which case, the decision to test will be made by the horse owner and their veterinarian. Release of the quarantined facilities will require EHV-1 testing to assure freedom of the disease.
- 12 quarantine and hold orders have been issued in 8 counties (Bent, Boulder, Garfield, Gunnison, Larimer, Mesa, Morgan, & Weld).
